

Welcome to Hannah's House!

Hannah's House focus on care and support for children with life-limiting or complex conditions which cause ongoing health complications and disability. Our goal is to help children live their best quality of life, while providing meaningful care to their families.

Our core service is the provision of in-home care or respite packages that help parents to meet the direct care needs of the child. This might include the activities of daily living, personal care, respiratory management, nutritional care, mobility and other therapies.

Staff are trained and matched by their skills and experience to each child so parents can feel confident to take a break from caregiving while staff are in their home.

We also offer Play and Creative Arts Therapies designed to bring joy to the child and family through social and recreational participation, establishing new relationships and support emotional wellbeing.

Families can feel safe in the knowledge that Hannah's House is a Registered and fully compliant NDIS Provider, works directly with Perth Children's Hospital and provides contracted services to the Child and Adolescent Health Service.

Our care is guided by our core values which include:

- ▶ Integrity
- ▶ Determination
- ▶ Collaboration
- ▶ Caring
- ▶ Kindness

Providing care, comfort and joy for children with life-limiting conditions

In-home care for kids with complex needs

What Services do we provide?

It's a labour of love; but caring takes a toll.

Burnout is a real and present danger for parents managing the challenges of providing 24/7 care to a child with complex health needs and disability. Hands on, practical help and support at home and in the community can make a big difference.

That's where Hannah's House steps in. We deliver in-home support and care for the child, offer parents a real break and focus on quality of life for the whole family.

Our services and support include:

- ▷ Transition from hospital to home-based care
- ▷ Short-term planned day or overnight respite
- ▷ Crisis support in times of high need
- ▷ In-home palliative respite and end-of-life care
- ▷ Complementary supports such as play therapy, creative arts therapy, play groups and education

Our support is flexible and always tailored to meet the needs and goals of the family.

Who Pays?

Good question! Unlike many providers, we offer care packages that are free of charge to families where funding is either unavailable or additional care is needed from time to time.

This is made possible through the generous support of several foundations including **Channel 7 Telethon** and community giving.

Playgroups, art therapies, family fun days and educational support all offered free of charge to all Hannah's House families.

Why choose Hannah's House?

Hannah's House specialise in support for kids! We care for children from birth up to 18 years of age. This means our team of support workers and registered nurses have paediatric experience and are skilled in meeting the needs and goals of children.

Hannah's House offers:

- ▷ Supports for children with neurological and respiratory conditions, global development delay, acquired brain injury and rare or life-limiting conditions.
- ▷ Staff skilled in complex care needs including tracheostomy and respiratory care, seizure management, nutritional feeding and other medical needs.
- ▷ Support co-ordinators and registered nurses with paediatric experience supervising staff and caring for families.
- ▷ Dedicated in-house educators providing training and support.
- ▷ A Play Specialist and Creative Arts Therapist who work with children and families to support social, recreation and mental health wellbeing.

What our families say

"Having a Support Worker from Hannah's House has made the biggest difference to our lives. I can leave Miss M for a few hours each week having peace of mind that she is being thoroughly looked after. It allows me to run everyday errands that are difficult to do with a child with special needs, gives me some downtime as well as one-on-one time with my son."

Miss M, aged 2 years, CDKL5 deficiency disorder

"Knowing that there's someone else taking over the care of Master T, it's not just me, gives my mind a rest. When I'm alone, my mind is constantly ticking, but I know once the carers are here, they're on top of his care so I can concentrate on other things."

Master T, 3 years old, chronic lung disease

"Miss C requires ongoing oxygen and has a concentrator and oxygen tanks which make it difficult and time-consuming to travel or go out with her. I use the time when Hannah's House are in to do normal everyday things like picking up my son from school, washing, shopping, house cleaning and going to my own appointments."

Miss C, Trisomy 21 (Down's Syndrome), cystic lung disease and cardiac issues
