In-home care for kids with complex needs

**In-home respite
& palliative care
for children with
complex needs**

What Supports can we provide?

Caring for a child with high and complex needs is a labour of love and can be very isolating. We offer in-home supports to provide parents with an opportunity to focus on other activities including sleep, shopping, appointments, staying in contact with friends and family, maintaining employment or spending time with their other children.

Families can 'take a break', knowing their child is being supported by a skilled carer. Giving parents time out encourages them to look after their own physical and mental wellbeing.

Our services and support include:

- ▶ Transition from hospital to home-based care
- ▶ Short-term planned day or overnight respite
- ▶ Emergency or crisis support in times of high need
- ▶ In-home palliative and end-of-life care.

Our support is flexible and always tailored to meet the needs and goals of the family.

Who Pays?

Good question! Unlike many providers, we offer care packages that are free of charge to families where funding is either not available or additional care is needed from time to time.

This is made possible through the generous support of foundations such as Channel 7 Telethon and community giving.

We also provide contracted supports through Child and Adolescent Health Services to support children transitioning home from Perth Children's Hospital.

Why choose Hannah's House?

Hannah's House specialise in support for kids! We care for children from birth up to 18 years of age. This means our team of support workers and registered nurses have paediatric experience and are skilled in meeting the needs and goals of children.

Hannah's House offers:

- ▶ Supports for children with neurological and respiratory conditions, global development delay, acquired brain injury and rare or life-limiting conditions.
- ▶ Staff skilled in complex care needs including tracheostomy and respiratory care, seizure management, nutritional feeding and other medical needs.
- ▶ Clinical co-ordinators and registered nurses with paediatric experience supervising staff and caring for families.
- ▶ Dedicated in-house paediatric educators providing training and support to staff and families.
- ▶ An in-house play specialist who can develop a 'Play Time Play Plan' to support your child's development milestones.

And our team are always kind, friendly and caring!

What our families say

“Support from Hannah’s House gave me a break from tending to Miss I’s care 24/7. Even short respite sessions were vital and kept me sane! They allowed me to get on with household chores and spend time with my other young child knowing Miss I was being well cared for.”

Mother, Miss I aged 2 years

“Support from Hannah’s House allowed us to “stay home” and reduce hospital admissions because we had the clinical support at home. We were able to go on adventures and get out and about, explore and have fun helping us to give Master M the best quality of life. They supported us 24/7 making sure they coordinated their time so we were never alone during those final days. They supported Master M as well as our extended family and has continued since Master M left us.”

Mother, Master M passed away aged 6 years

“Hannah’s House were great! They were able to provide inhome support and it made such a difference to Miss S and our life as a family. Miss S is much more independent and just loved spending time with her worker, reading books, taking walks, exercising and just playing like a kid her age. Having never spent much time away from Miss S, I got some of my own identity back. Some normality, in a relentless journey.”

Mother, Miss S aged 3 years

Master M, passed away 6 years

Welcome to Hannah's House!

Hannah's House is a dedicated paediatric service caring for children and young people from birth to 18 years who have a life-limiting condition or complex needs.

We support the child with their physical, mental and social wellbeing from diagnosis to recovery or palliative care and end-of-life.

We focus on quality of life for the child and support for the whole family.

Our vision is to provide care, comfort and joy for every child with a life-limiting condition and their family in our home 'Hannah's House' and in theirs.

Alongside our in-home service, we believe that a dedicated children's hospice is needed in Western Australia to provide families with a choice of care options for a sick or dying child. A children's hospice would complement the acute care offered by Perth Children's Hospital and other medical and allied health professionals.

Our care is guided by our core values which include:

- ▶ Integrity
- ▶ Determination
- ▶ Collaboration
- ▶ Caring
- ▶ Kindness.
